Wooly Buggers, Leeches and Streamers

I offer Wooly Buggers in Bead Head, Conehead and regular styles. The Bead Head and Conehead patterns sink more rapidly and undulate as they are stripped in on the return. I use Krystal Flash in the tail on all my Wooly Buggers because it gives that extra flash that trout find irresistible. I've caught most of my biggest trout fishing wooly buggers out of a float tube in lakes. Please Specify Size, Color, Weighted, and Bead or Cone Head.

Leeches are a significant source of food in many lakes. I feature a Mohair Leech pattern that is simple, but very effective. All of my leech patterns are weighted to get down quickly, and undulate on the return, just like the natural.

Streamers may save the day on a tough hatchless day. I've picked just a few of my favorites to feature in the catalog.

If you have a special pattern that's not listed here, let me know. I'm sure I can tie it!
